Application / Design Features:

- External dimensions are as shown for all W-Series and WM-Series Crane Buffers.
- All buffers include full drive down package for use of buffer stroke as crane approaches.
- All buffers are rated for -40 degrees F to +160 degrees F continuous duty.
- Protective rubber bellows also available as an option for foundry or melt shop service, or where severe dirt or ice is present.
- Wire rope safety cables are included on all sizes to meet OSHA requirements for overhead cranes. This feature may be omitted by request.
- No maintenance, refilling, or adjusting required. The buffer will automatically adjust itself to absorb any impact within its capacity diagram.
- Solid stainless steel piston rod, hard chrome-plated cylinder, and painted mounting standard on all models. All models have one-piece cylinders machined from billet stock.
